

Kuri-Clamp™ Standard Duty Worm Gear Clamp

WGC-CS Series WGC-SS Series

General Applications:

- Automotive
- Industrial
- General purpose

Construction (WGC-CS): Four-piece construction consisting of a 1/2" wide, 300 series stainless steel band; plated carbon steel hex screw with 5/16" head and two-piece, 300 series stainless steel housing.

Construction (WGC-SS): Four-piece construction consisting of a 1/2" wide, 300 series stainless steel band; stainless steel hex screw with 5/16" head and two-piece, 300 series stainless steel housing.

Features and Advantages:

- **Quadra-Lock Housing** – Four-piece, quadra-lock housing design: added saddle eliminates risk of seam separation, virtually eliminating housing “lift and twist”.
- **Evenly Distributed Radial Pressure** – Quality controlled to military standard specifications for even distribution of sealing pressure. Eliminates leakage caused by uneven housings and provides higher sealing pressure with lower applied torque.
- **Arched, Perforated Slots** – Provides for more overall steel between perforations for added band strength and allows for smoother engagement.
- **Stainless Steel Band** – 300 series stainless steel band provides durability and superior corrosion resistance.
- **Hex Screw** - Sharply defined hex angles for better gripping power. More threads per screw results in increased torque strength.
- **Meets Industry Standards** – Clamps are SAE J1508 Type F and RoHS compliant.
- **Torque Rating** – Suggested installation torque of 25-37 inch pounds (WGC-CS), and 30-45 inch pounds (WGC-SS).

Because we continually examine ways to improve our products, we reserve the right to alter specifications or discontinue products without prior notice.
